

THE LATEST ADDITION TO
THE PC AQUALINE RANGE...

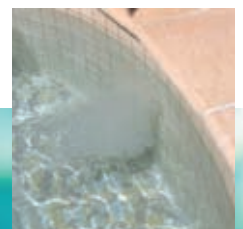

PALM CONTROLLER™

Controls waterfalls and other water features

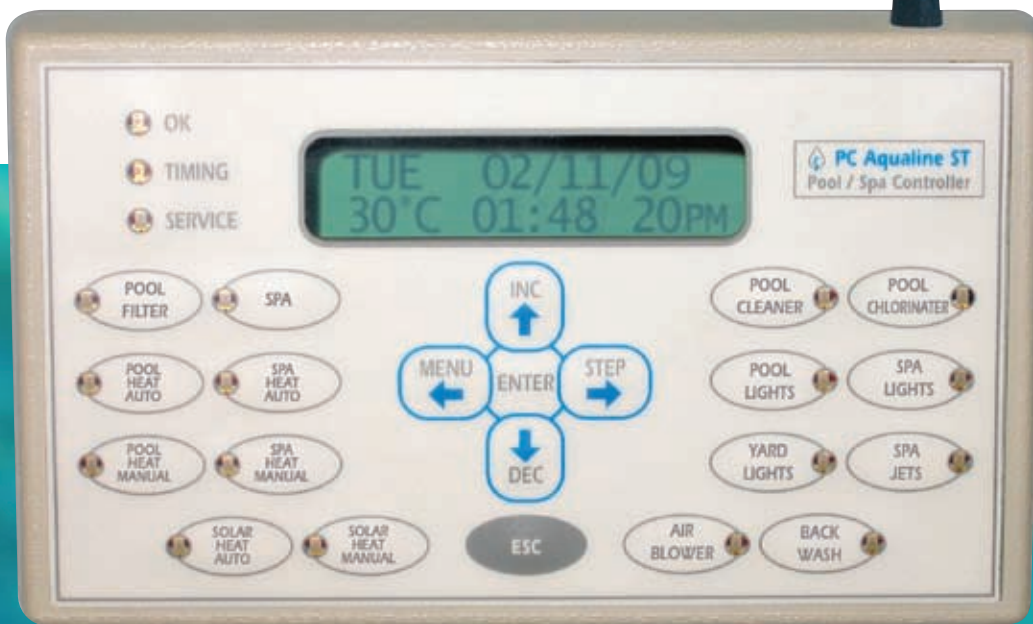

Motorised valves controls pool/spa switching and water features

Controls spa jet-blowers and lights

Integrated with Home Automation

THE ULTIMATE BACKYARD ENVIRONMENT CONTROLLER FOR YOUR PALM!

Palm Control

Now your PC Aqualine Palm Controller in-house panel can be portable to use around the pool by simply removing it from the in-house charger; and when finished, simply plug back into your charger.

Impressive performance in wireless control

The PC Aqualine Palm Controller brings the power and flexibility of a hand held wireless control system.

Designed for wireless use in a backyard environment. the PC Aqualine Palm Controller packs a powerful Pool and Spa Control System into an easy to use wireless system.

Ultimate in convenience

Enjoy wireless command of your backyard environment at your fingertips, while you are relaxing in the spa or pool, control is never far away.

Ultimate in features

Turn on your lights, change the temperature, set your water features in motion, even programme your settings without getting out of the spa or your pool side lounge.

Ultimate in control

With the Palm Controller, you have the key capabilities of a wired controller in the palm of your hand.
